

# COVID-19 deaths of Welsh Care Home Residents — UPDATE 02 September

Since week 12, there have been 1446 excess deaths of adult care home residents in Wales compared to 2018/2019 average  
Of these, 743 were attributed to Covid-19

Data source: Care Inspectorate Wales

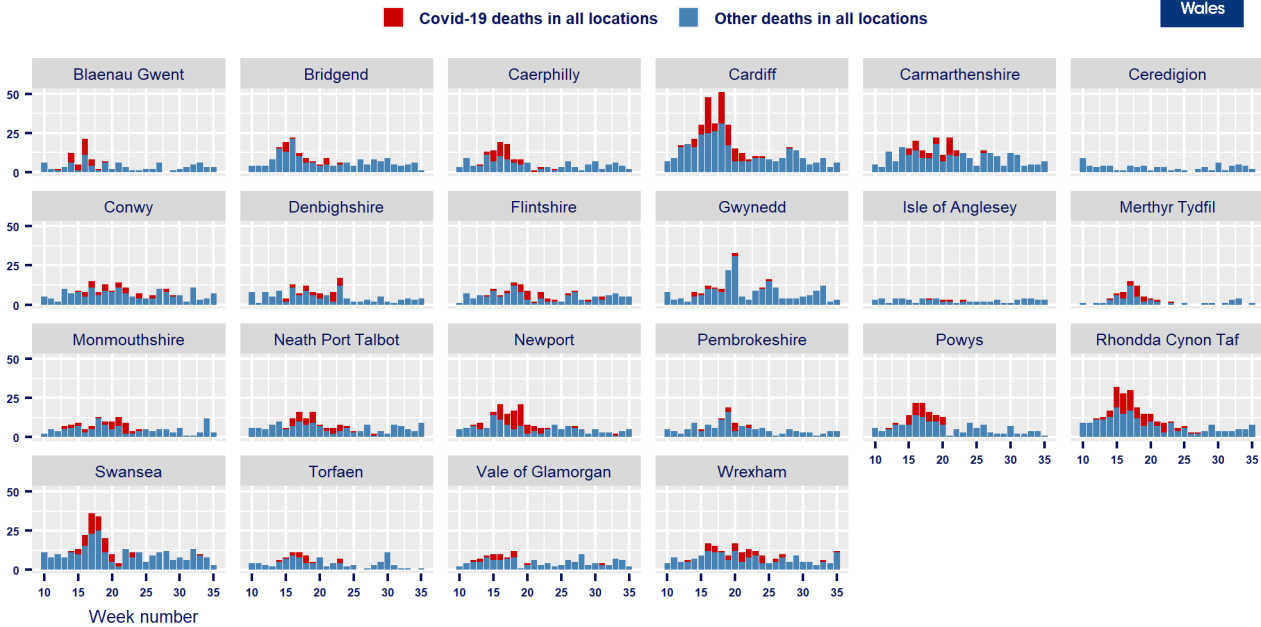

There have been 1,446 excess deaths of adult care home residents in Wales since week 12. Around three quarters of these deaths occurred in nursing homes. Of the total excess deaths, 743 (51%) were attributed to COVID-19. There was 1 new notification of a death attributed to COVID-19 in weeks 34 and 35.

There have been no new notifications of COVID-19 deaths in the last four weeks in 19 of the 22 Welsh local authorities. On average across Wales just under 3 care home residents with COVID-19 have died per 100 care home beds.

The data presented here are based on notifications of deaths to Care Inspectorate Wales and include deaths of care home residents in all locations except where indicated. The data include deaths of people with suspected or confirmed COVID-19 and are based on the date of notification to CIW, rather than on the date of death. Data are provided up to the week ending 28 August (week 35). Data on bed numbers were provided by CIW in early June.

The Welsh Government statistical release relating to this data is available here: <https://gov.wales/notifications-deaths-residents-related-covid-19-adult-care-homes-1-march-28-august-2020-html>

Swansea, Newport and Wrexham were the only areas with notifications of care home resident deaths from COVID-19 in the four weeks to 28 August
