

# COVID-19 deaths of Welsh Care Home Residents — UPDATE 24 November 2020

Since week 12, there have been 1594 excess deaths of adult care home residents in Wales compared to 2018/2019 average  
Of these, 934 were attributed to Covid-19

Data source: Care Inspectorate Wales

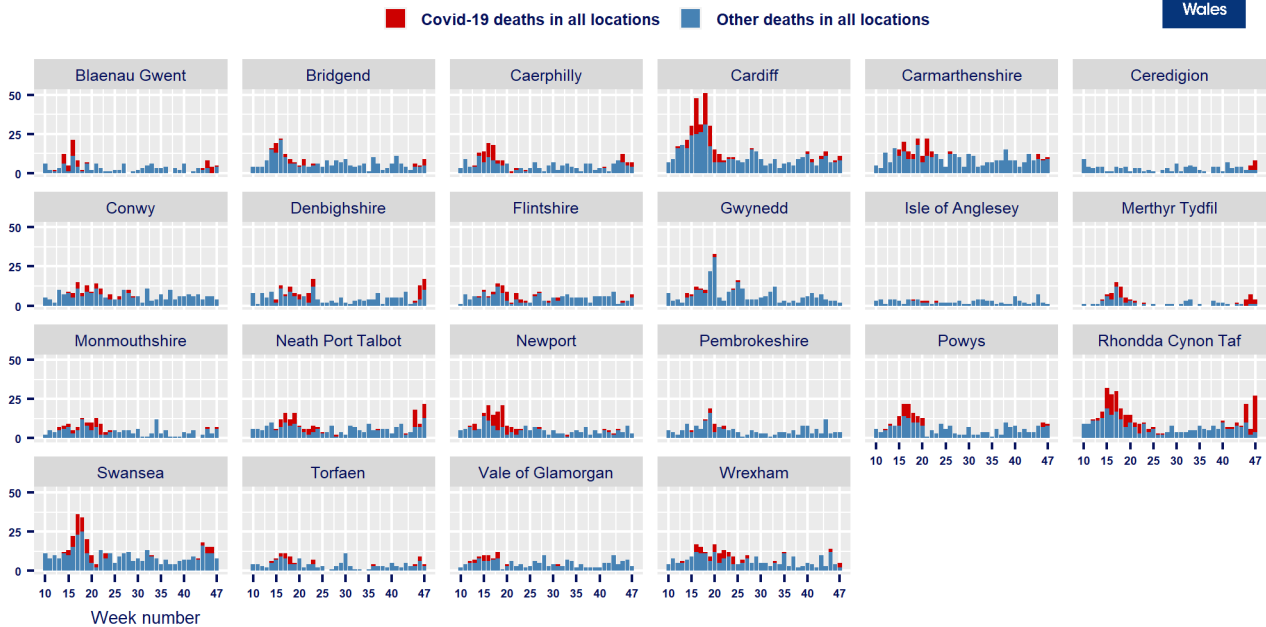

There have been 1,594 excess deaths of adult care home residents in Wales since week 12. Around 68% of these deaths occurred in nursing homes. Of the total excess deaths, 934 (59%) were attributed to COVID-19. There were 68 new notification of deaths attributed to COVID-19 in week 47, the highest total since week 19.

There have been new notifications of COVID-19 deaths in 16 of the 22 Welsh local authorities in the last three weeks. On average across Wales, since week 12, 3.6 care home residents with COVID-19 have died per 100 care home beds.

The data presented here are based on notifications of deaths to Care Inspectorate Wales and include deaths of care home residents in all locations except where indicated. The data include deaths of people with suspected or confirmed COVID-19 and are based on the date of notification to CIW, rather than on the date of death. Data are provided up to the week ending 20 November (week 47). Data on bed numbers were provided by CIW in early June.

The Welsh Government statistical release relating to this data is available here: <https://gov.wales/notifications-deaths-residents-related-covid-19-adult-care-homes-1-march-20-november-2020>

There have been notifications of care home resident deaths from COVID-19 in 16 of the 22 Welsh local authorities over the 3 weeks to 20 November
